

Notice to Parents and Students Regarding the Use of Audio/Video Equipment on School Buses

Audio/Video recording equipment may be installed on school buses to monitor school transportation and may be recording bus activity and student behaviors. Students may not always be aware when recording is taking place.

Big Sky bus Lines Safety Supervisor or a representative of Big Sky Bus Lines may review audio/video recordings on a routine basis and evidence of student misconduct will be addressed. Students found to be in violation of bus rules will be notified and discipline will be initiated. The Great Falls Public Schools progressive discipline protocols will be enforced by the management of Big Sky Bus Lines.

All audio/video records will be treated as private records and kept secure by Big Sky Bus Lines. Those who are not related to a disciplinary incident will not be permitted to view audio/video records.
